

YOUR LAPTOP BATTERY JUST CAUGHT
FIRE ... AND IS SPEWING TOXIC FUMES!

NOW HOW FAST CAN YOU CONTAIN IT?

HOT-STOP® 'L' - EVO FIRE CONTAINMENT

Burn Certified #60-322534

WITH THE HOT-STOP® 'L' - EVO – YOU CAN CONTAIN YOUR DEVICE AS QUICKLY AS 6 STEPS IN 6 TO 10 SECONDS!

How fast you contain the event is the name of the game when you are at altitude. Other fire containment boxes and kits require you to obtain water and list as many as 23 steps to secure the burning device! All the while, the runaway battery is spewing toxic gasses into the cabin and cockpit!

Don't take chances! HOT-STOP 'L' - EVO Fire Containment contains 100% of Smoke and Flames. That means ZERO, NADA, ZIP toxic emissions!

For independent video footage of bag demonstrations, including Major Airlines, please contact Tom Connolly at tconnolly@iepindustrial.com or call (717) 492-1853.

Designed to contain a PED that reaches thermal runaway and contain it until it has burned out

- Zippered technology adds complete protection to capture volatile emissions from Li-Ion powered devices
- Large bag (27" x 26") accommodates all devices to include laptops, defibrillators, tablets, cell phones, portable chargers, battery packs, and more
- Allows the use of water so that Airline operators and others can comply with SAFO FAA recommendations.
- Sold as kit – includes reflective carry/storage sling, and gloves
- Still burn certified and independently tested *

*NOT tested at a backyard near you!
