

THINK FIRE CONTAINMENT IS ONLY FOR LAPTOPS? THINK AGAIN!

HOT-STOP® "L" CUSTOM SOLUTIONS DRONE BATTERY-PACK KIT NOW AVAILABLE

Baker Aviation and IEP, the leaders in Li-Ion fire containment solutions continue to offer customized bags for your Li-ion battery transportation needs.

An example of our newest drone battery
4-BAG CONTAINMENT KIT for the military

ALL OF OUR CUSTOM BUILT KITS MEET THE SAME HIGH STANDARDS AS OUR HOT-STOP® "L" BRAND OF PRODUCTS

- Safely contains fires, explosions and smoke emissions from Lithium-Ion powered devices without the aid of a water supply (however, HOT-STOP® products allow for the use of water, for airlines and operators complying with SAFO FAA recommendations)
- The distinctive HOT-STOP® 'L' solution has been successfully demonstrated twice in live fire evaluations at the FAA Technical Center in Atlantic City, New Jersey and further independently fire tested by flight departments and airlines
- Only product line in this market to receive burn certifications
- HOT-STOP® 'L' Kits include a pair of 14" fire safety gloves and can be used to safely store a laptop, tablet, or smart phone when not in use, contain an overheating device, or one that is in full thermal runaway
- HOT-STOP "L" products are made up of multiple durable fabrics with a felt inner core that has a 3200°F melting point which is sandwiched between two outer layers that have a 2080°F melting point and are proven to absorb energy and fire while eliminating the escape of smoke, sparks and flames
- Available in multiple sizes to fit various devices up to the large 25" x 25" bag designed to contain defibrillators and all-in-one computers. Optional accessories are also available, including a carry/stowage sling and an exterior carry bag with zipper

For independent video footage of bag demonstrations to include demonstrations with Major Airlines, please contact Tom Connolly at tconnolly@iepindustrial.com or call (717) 492-1853.
