

TO OUR 1<sup>ST</sup> GENERATION HOT-STOP® 'L' USERS

Thank you  
FOR YOUR LOYALTY!

NOW LET US RETROFIT YOUR KIT TO OUR NEWEST TECHNOLOGY - THE HOT-STOP® 'L' EVO

## Our new HOT-STOP® 'L' EVO is still PROVEN

INDEPENDENTLY TESTED AT UL APPROVED LABORATORY AND STILL THE ONLY BURN CERTIFIED KIT ON THE MARKET

Although your original HOT-STOP® 'L' is still relevant, technology marches on and new higher capacity batteries and plastic materials create more smoke and toxic emissions during a fire event! The HOT-STOP® 'L' product line continues to EVolve to accommodate new technology and materials! We don't want to leave our loyal customers behind and so we are offering this retrofit at a low cost! Our retrofit cost is less than buying a new kit.

Our EVO retrofit will allow you to protect yourself against smoke, toxins, harmful carcinogens, fire, shooting molten metal and other emissions caused by the latest technology in today's electronic devices.

Don't expose yourself! Ingesting any of these can result in immediate and permanent damage!

Our **NEW Zero-Tolerance** technology means **ZERO SMOKE!**

5 to 10 seconds max to deploy and in no more than 6 easy steps!

No need to add liquid as adding liquid extends the time for actual containment and can result in additional exposure to a burning battery!

### DON'T BECOME A FIRE FIGHTER!

#### RETROFIT INCLUDES

- Inspection of existing core of kit and repairs made as needed
- Replacement of exterior
- Airtight military grade zipper installed
- New instruction tab installed!
- Supplied with carry strap or storage bag, your choice
- One day turn-around available
- Developed by the Pioneers in Li-Ion battery fire protection technology
- Designed to contain a PED that reaches thermal runaway and contain it until it has burned out
- New one-size-fits-all HOT-STOP® 'L' EVO phone bags now available on Amazon.com
